

Attila Kondor

Student, AI & Automation | Security Studies

The Hague, Netherlands | attilakondor006@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Security Studies student at Leiden University building practical AI and automation tooling: Python, JavaScript/React, and the Claude/MCP ecosystem for daily development, prompt design, and agentic workflows. Sole developer of a browser-based music-analysis engine combining signal-processing algorithms with an integrated AI tutor, taking chord-recognition accuracy from 37% to 81.85% through iterative testing. Developing a focus on AI governance and the security implications of frontier AI systems, alongside professional-grade audio engineering credentials.

Education

Leiden University - The Hague

Sep 2025 - Present

BSc Security Studies, developing a focus on AI governance and the security implications of frontier AI systems

- Coursework in governance of multilateral security institutions, risk assessment, and institutional resilience
- Building toward the MSc Crisis and Security Management (Cybersecurity Governance track), with particular interest in AI security and compliance frameworks such as the EU AI Act

Abbey Road Institute - Amsterdam

Sep 2024 - Sep 2025

Sound Engineering & Production (EQF Level 5)

- Final grade 81.88% with a solid understanding of monitoring and control-room workflows
- Fault diagnosis and root troubleshooting on professional broadcast consoles and software

International School of The Hague

Sep 2024 - Sep 2025

International Baccalaureate Diploma Programme

- Studied: Computer Science, Mathematics, Global Politics, Music, Dutch and English
- Computer Science IA: authored analytical research comparing brute-force and nearest-neighbour algorithms for solving the Travelling Salesman Problem across varying input sizes

Projects & Technical Experience

Founder & Developer, Harmonic Conservatory

2025 - Present

Nebula ScoreWorks: self-built music-technology platform using Python, JavaScript/React, Git, Claude API

- Designed and built a browser-based MIDI/MusicXML harmonic analyser, implementing Viterbi-decoded chord-progression detection, Krumhansl-Schmuckler key detection, and statistical pitch-class scoring; lifted chord-root recognition accuracy from 37% to 81.85% on the POP909 benchmark
- Integrated the Claude API to power an adaptive AI tutoring layer, and built the React front-end with a scoped ~3,550-line CSS design system, validated against a Node.js regression harness across 6+ iterations

Operation Nexus, Crisis Simulation Web App

2026

Academic project, Leiden University IP1 course: Next.js, Vercel, Neon (PostgreSQL), Git

- Built a full-stack web application simulating a human trafficking and state-complicity crisis, used as a live simulation tool for the course cohort, including a flowchart-driven decision system and a PDF session-record tool
- Maintained an organised, transparent Git workflow throughout development, documenting AI-assisted contributions clearly in line with Leiden's academic AI-use disclosure expectations

Music Instructor

2022 - Present

Self-Employed, The Hague

- Implemented conversational AI workflows using Python and PyTorch with the OpenAI and ElevenLabs APIs, and automated repetitive production tasks with terminal scripting

Volunteer Experience

Refugee Housing Construction

2022 - 2025

Assistant, Slovakia

- Assisted in building homes for Ukrainian refugee families, including essential infrastructure
- Helped families navigate legal entitlements and find employment to foster independent lives

Skills

Python
JavaScript / React
Git / Version Control

Claude API / MCP / Agentic
Workflows
System Troubleshooting
Fault Isolation

Terminal / Debian / Parrot OS
Risk Analysis
Logbooks

Additional information

Languages: English (Fluent) | Dutch (Professional Working Proficiency) | Slovak (Native)

Certifications: NECIS Creative Arts Festival, International School of Luxembourg

GitHub: 34 repositories, 15 stars, active since 2023, spanning Python, JavaScript, and TypeScript (github.com/dhm-ak)

Academic & Technical Activities: Organised and led 8D spatial audio technical conferences exploring immersive sound design and signal processing
